Profile

Senior Product & UX/UI Designer with 7 years in product and UX design across healthcare, SaaS and AI-powered products. I connect discovery, user research and product analytics with interaction design, design systems and delivery. Experienced in complex multi-role workflows, working with founders and developers, and mentoring designers.

Core Expertise

Product & UX: Product discovery, product strategy, user interviews, usability testing, journey mapping, information architecture, user flows, wireframing, prototyping, A/B testing, product analytics.

Systems & delivery: Design systems, component libraries, design tokens, responsive web and mobile design, accessibility, developer handoff, design QA, stakeholder management, workshops, mentoring.

Experience

Computools | Sep 2025 – Present

Senior Product & UX/UI Designer · Full-time

Selected client projects

VesselHaven | Dec 2025 – Present

Multi-role yacht management, financial operations, community and services marketplace across desktop, tablet and mobile.

- Led discovery and UX research across owners, captains, crew, brokers and service providers. Mapped information architecture and connected workflows for trip planning, guest invitations, crew coordination and the services marketplace.
- **Designed financial-operation workflows, including transactions and quotations**, translating complex operational tasks into consistent screens and interactions.
- **Designed Stripe payment workflows** and tailored the payment experience to VesselHaven's branding.
- Refined role-specific onboarding using Hotjar insights: simplified guest access with magic-link invitations and moved optional owner details later in the flow.
- Built a **65-component, 287-token design system** for light and dark themes, used across **84% of screens**. Shared navigation, form, status and dashboard patterns support consistent experiences across modules and devices.
- Created interactive prototypes and used Claude-assisted exploration to compare interaction directions. Worked with stakeholders and engineers on design review, frontend implementation and handoff.

Vaults1 | Sep 2025 – Dec 2025

Self-storage discovery, comparison and reservation platform.

- Conducted discovery and UX research; designed the search-to-payment journey, dashboards and marketing pages, supported by reusable components and simplified information architecture.

The Pause Technologies Inc. | Dec 2024 – Present

Senior Product & UX/UI Designer · Contract

Harmoni by ThePause | Dec 2024 – Present

Women's health platform for perimenopause and menopause, with symptom tracking, personalised insights and AI-powered guidance.

- Initiated Mixpanel event tracking with developers and built the first end-to-end funnel view using **Mixpanel and RevenueCat**. Identified email-OTP registration and the paywall as key drop-offs, challenging the assumption that onboarding was the main problem.
- Identified a broken social sign-in and redesigned registration around privacy information and separate email opt-in. Following the fix and UX changes, **sign-up drop-off nearly halved**.
- Redesigned the paywall around a personalised plan, prepared **four trust-signal variants for A/B testing**, and moved the product to freemium: free tracking and premium recommendations.
- Mapped analytics gaps, benchmarked pricing against six women's health apps and prepared a **90-day product and growth recommendation** for the founders. Used community feedback to propose symptom-understanding features and a revised free/premium split.
- Led the mobile and web rebrand from ThePause to Harmoni; designed symptom tracking, insights and AI guidance, and maintained a shared design system. Partnered with founders, healthcare experts and developers through GitHub and AI-assisted workflows.

Remedy Product Studio | Jan 2022 – Nov 2024

UI/UX Designer

- Designed healthcare products from discovery and research to delivery. Managed client and stakeholder communication across cross-functional teams.
- Ran UX workshops for designers, PMs and developers; mentored designers through reviews and 1:1 sessions, and supported onboarding to new tools.

Selected client projects and internal design system

Between Health | Sep 2024 – Oct 2024

Designed maternal-health journeys for mothers and doulas, including communication and profile management; built a component library and delivered designs with developers.

ThePause | May 2024 – Oct 2024

Designed a menopause companion app and worked with a medical expert on the medical data collection flow. Interactive prototypes improved task accuracy by **30% (relative increase)**.

Remedy Product Studio — continued

UI/UX Designer · Selected projects · Jan 2022 – Nov 2024

She Matters | Jan 2024 – Sep 2024

Owned concept-to-testing design for an app supporting Black pregnant women with preeclampsia; built a design system including smartwatch components.

Remedy Design System 2.0 · Internal | Dec 2023 – Mar 2024

Created documented, responsive components and a process for synchronising them with development. Managers estimated a **35–45% reduction in frontend development time** with reusable components.

Caraway Health | Oct 2022 – Dec 2023

Designed mobile and web healthcare flows for young women, including emergency interactions, health-measure entry and recommendations.

Earlier Experience

Seven · UI Designer | 2021 · 6 months

Structured Figma files, components and design styles for healthcare SaaS; prepared clickable prototypes.

Freelance · Site Design & Development | 2021

Researched, designed and built websites with low-code tools, including WordPress, Tilda, Wix and Webflow; connected Google Analytics.

24Eastyard · Project Manager & UX Designer | 2019 – 2020

Owned UX flows, wireframes and prototypes for Spark smart parking (UAE) and Mraity beauty services (Egypt and Jordan). Managed client communication, planning and estimates.

Business Analyst · Earlier Career | 2010 – 2020

Analysed business processes, organised workflows and customised accounting and office software across multiple companies.

Tools & Technology

Design & analytics tools: Figma, FigJam, Lottie, Mixpanel, RevenueCat, Google Analytics, Hotjar, SurveyMonkey.

AI & development collaboration: Claude, ChatGPT, Cursor, Lovable, GitHub, HTML/CSS, React/Next.js, AI-assisted prototyping and design-to-code workflows.

Web & project tools: WordPress, Elementor, Webflow, Wix, Tilda, Jira, Trello.

Education & Certifications

Analytics certifications · 2026: Google Analytics (Google); Amplitude Practitioner – Acquisition (Amplitude Academy, Oct); Mixpanel Fundamentals (Mixpanel, Oct); Hotjar Certification (Hotjar by Contentsquare).

UI/UX Design · Beetroot Academy · 2021

HTML, CSS, JavaScript · FreeCodeCamp · 2017

MA in Economics · Vasyl Stefanyk Precarpathian (Fedkovych) National University · Accounting & Business
